Dear Paul,

A permanent post-phlebitic conditions limits what I can do to only part of my own work.

While I'd probably like to read your collection of letters referred to in your 9/7 and would probably include them for archival value, they do not represent that fow chich I can take any time.

I've tried.

The incredible garbage dumped as fact on the Congress has been ruinous. Every nut in the world has besieged it.

I also will not be part of any theorizing approach.

The one way to defeat any channe of success is by substituting the pursuit of theories for the pursuit of relevant fact.

Impressed as you are by Downing he is a dope. I've had that connection, too.

I don't recall if you have all my books. They are the best source on the FBI coverup.

Sincerely,
